

WooCommerce is now the most popular eCommerce platform on the web. It allows you to sell anything, beautifully. Built to integrate seamlessly with WordPress, WooCommerce is the world's favorite eCommerce solution that gives both store owners and developers complete control.

Pragmatic has developed a module as a connector between Odoo - Woocommerce. Now user can easily Import data from Woocommerce to Odoo. List of features of this connector is mentioned below:-

- Import Product Category from Woocommerce to Odoo
- Import Product from Woocommerce to Odoo
- Import Inventory from Woocommerce to Odoo
- Import Customer from Woocommerce to Odoo
- Import Sales Order from Woocommerce to Odoo

## Configuration

1: Odoo - Woocommerce Connector.

**Settings** | General Settings | Users & Companies | Administrator

Companies / Himesh Test

Company Name: **Himesh Test**

General Information | **WooCommerce Connector** | SQL Server Configuration

**WooCommerce Configuration**

[Authenticate](#)

**Credentials**

Consumer Key	ck_74b758ac854c2d110d8ac088406000a118d711d1	Authorization URL	https://woocommerce.com
Consumer Secret	cs_83a4918807e9d0000ac77e6727dea2a7d013c81	Google API Key	AIzaSyQ7mCk2u4Q2oH5IMQLEHJ5pawebg13d

**Vendor Commission Charges**

Commission	10.00	COD Charges	0.50
		Online Charges	2.50

**Delivery Commission Charges**

Charges per KM	5.00	Ship Rocket Delivery	[SR-D0001] Ship Rocket Delivery
		Normal Delivery	[N-D0002] Normal Delivery

Under **Company**, you can find a tab named **Woocommerce connector**, where you need to add information like **consumer key**, **consumer secret** and **authorization url**.

We need to set commission for vendors and delivery. This is the one time configuration where we need to map which are available in woocommerce. These are important factors as this helps to handle us with the proper accounting.

**Settings** | General Settings | Users & Companies | Administrator

**Himesh Test**

General Information | Ship Rocket Configuration | WooCommerce Connector | **SQL Server Configuration**

**SQL Server Configuration**

[Test Connection](#)

**Credentials**

SQL Username	wordpress	SQL Host	95.216.232.248
SQL Password	*****	SQL Database	wordpress_demo

**Initial Sync**

[1-Sync Vendor](#)

Last Synced On	06/18/2020 10:18:47
Last Imported Id	3

Now the second part is to configure SQL of Wordpress to Odoo. This configuration is important because this configuration help us to fetch vendors from Woo commerce which were not directly available through API's

We need to fill in necessary information like **Username**, **Password**, **Host** and **Database name**.

Once user can Import the Product from woocommerce to odoo, User can see WooCommerce Id over the form.

The screenshot shows the Odoo product form for a product named "Glasses". At the top, there are buttons for "Edit", "Create", "Print", and "Action". Below these is a button for "Update Qty On Hand". The product name "Glasses" is displayed with a small image of a woman wearing glasses. To the right of the name are checkboxes for "Can be Sold" and "Can be Purchased". Further right, there are statistics: "11 On Hand", "11 Forecasted", "0 Reordering R...", "0 Sales", "0 Purchases", and "Active". Below the statistics are tabs for "General Information", "Variants", "Sales", "Purchase", "Inventory", "Invoicing", and "Notes". The "General Information" tab is selected, showing fields for "Product Type" (Stockable Product), "WooCommerce Id" (577), "Category" (Fashion), "Internal Reference", "Barcode", "Sales Price" (600.00 €), "WooCommerce Sale Price" (0.00), "Cost" (0.00 €), "Company" (My Company), "Unit of Measure" (in), and "Purchase Unit of Measure" (Unit(s)).

Field	Value
Product Type	Stockable Product
WooCommerce Id	577
Category	Fashion
Internal Reference	
Barcode	
Sales Price	600.00 €
WooCommerce Sale Price	0.00
Cost	0.00 €
Company	My Company
Unit of Measure	in
Purchase Unit of Measure	Unit(s)

Similarly WooCommerce Id reflects on Customer form once imported to Odoo.
